Hostler Burrows

We very much appreciate the New York gallery Hostler Burrows, which in terms of Ceramics, is a pool of new discoveries each time. Among the finds of this edition, an immaculate and linear series of **Anat Shifan** and a series of sandstone with organic forms of **Kristina Riska**. As for the ***Purple Blue Platelett Cluster*** collection of **Eva Zethraeus**, we had already discovered it during **the 2018 edition in Miami**, but it is a real pleasure to see it presented again.
